## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18 and 21-22, drawn to a method of treating disorders marked by a loss of pigmentation comprising the steps of: administering an effective amount of vitamin B12, copper, folic acid and vitamin C to a patient, classified in class 424, subclass 630, 641; for example.
- II. Claims 19 and 20, drawn to a method of treating disorders marked by a loss of pigmentation in a female patient comprising the steps of: on days when said female patient is not undergoing menses, administering an effective amount of vitamin B12, copper, folic acid and vitamin C; and on days when said female is undergoing menses, administering an effective amount of vitamin B12, folic acid and vitamin C, classified in class 514, subclass 52, 168, 474, 904; for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions have different method steps. Group II invention requires the predetermination if a female patient is undergoing menses, which is not required in the Group I invention and, depending on the outcome of that determination, the

Art Unit: 1616

composition used in the method of treating disorders marked by a loss of pigmentation in a female patient changes.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), and would present an undue burden of search on the Examiner, restriction for examination purposes as indicated is proper.

A telephone call was made to Terry Karmer on 04/06/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions

Art Unit: 1616

unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ernst V. Arnold whose telephone number is 571-272-8509. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreeni Padmanabhan can be reached on 571-272-0629. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
